Allowable Subject Matter

1. Claims 1-11 are allowed.

Independent claims 1, 4, and 6 are directed towards "...a method of generating a transition template suitable for insertion between an arbitrary a past reference picture and a future reference picture in a compressed digital data stream to produce, upon decompression of said compressed distal data stream-a desired transition between said past reference picture and said future reference picture, the method including the steps of: generating a series of transition pictures including a first transition picture and a last transition picture wherein each transition picture includes a series of rows of macroblocks, each row including a first macroblock and a last macroblock..." which is a feature that is not anticipated nor obvious over the art of record. Dependent claims 2-3, 5, and 7-11 are allowed for the reasons concerning the independent claims.
